

PROFILE

Design Engineer with 5+ years of experience designing and building complex digital products from discovery through production. Combines product design, user research and interaction design with React, TypeScript, Next.js and Three.js engineering. Experienced in rapid code prototyping, design systems, 3D interfaces, AI-enabled workflows and end-to-end product ownership.

SKILLS

- **Design Engineering**
Code prototyping, interaction design, responsive UI, component systems.
- **Product & Research**
Discovery, interviews, workshops, usability testing, Agile delivery.
- **Front End**
React, Next.js, TypeScript, Three.js, Tailwind, Material UI.
- **Data & Delivery**
REST, GraphQL, Node, schema design, Neon, Git, Azure, CI/CD, Vitest.
- **Design Systems**
Figma, design tokens, reusable components, accessibility-aware UI.

ELENI CHASIOTI

DESIGN ENGINEER / UX ENGINEER

Product design + production engineering

EXPERIENCE

ASSOCIATE DESIGN SYSTEMS ANALYST

DEC 2024 - PRESENT

DESIGN ENGINEERING & R&D | FOSTER + PARTNERS. LONDON.

- Lead design and engineering of internal digital products from discovery and rapid prototyping through implementation, deployment and user testing.
- Work with architects, engineers, environmental specialists and designers to translate complex workflows into web tools, automation and product experiences.
- Prototype in Figma or directly in code, then build React/Next.js applications with TypeScript, Three.js, APIs, databases and Azure-based delivery.
- Create complex 3D interfaces and data visualisation; extend component libraries and design tokens for reusable, responsive UI.
- Lead two applications end-to-end, defining sprint scope, priorities and responsibilities while coordinating contributors, stakeholders and management.
- Integrate AI-powered agents into products and use AI-assisted coding and design workflows to move from concept to validated implementation quickly.

DESIGN ENGINEER / COMPUTATIONAL DESIGNER

NOV 2020 - NOV 2024

BYRDEN WOOD. LONDON.

- Owned specialist B2B products across workflow discovery, UX design, front-end development, deployment, testing, training and ongoing user support.
- Worked with expert engineering teams to extract domain rules and translate specialised design processes into automated digital workflows.
- Designed interfaces in Figma and implemented them directly in production, often acting as both product designer and front-end engineer.
- Delivered applications used by hundreds of expert users that consolidated multiple software workflows, captured organisational knowledge and reduced repetitive work and errors.
- Adapted and extended component systems for client branding and specialised requirements; mentored junior team members and presented to clients and senior stakeholders.

EDUCATION

MASTER OF SCIENCE MSC IN ARCHITECTURAL COMPUTATION

THE BARTLETT SCHOOL OF ARCHITECTURE, UCL. LONDON. SEP 2019 - SEP 2020

MASTER OF ARCHITECTURE

ARISTOTLE UNIVERSITY OF THESSALONIKI. GREECE. SEP 2013 - APR 2019

MSc focus: computational design, automation, generative design and parametric systems. Thesis: Wave Function Collapse for building design, implemented as a C# Grasshopper plugin for Rhino.
